About This Course

- **This course is intended to introduce you to Interfolio Faculty Activity Reporting (also known as Faculty180) as a Faculty User and get you started with some of its basic functions.**

Interfolio Training Outline

1. Faculty 180
   1. Overview
      1. Menus
      2. Profile
   2. Activities
      1. CV
   3. FAR Vita

What is Faculty Activity Reporting (FAR)?

Centralized Tool for Managing Faculty Data Streamlines tracking of faculty performance across research, teaching, and service.

- Key Features:
  - Data Automation: Integrates with Scopus and other external databases.
  - Custom Reporting: Facilitates internal reviews and accreditation processes.
  - Self-Reporting: Allows faculty to update their information easily.
- Benefits:
  - Efficiency: Reduces administrative workload.
  - Data Accuracy: Ensures reliable, up-to-date faculty information.
  - Comprehensive Overview: Supports performance reviews and strategic decisions

| Teaching Interests ▲	Research Interests	Actions
One of the things I enjoy most about being a faculty member is teaching. I believe that the real challenge in teaching is to support the learning of elementary knowledge by exposing learners to relevant and real environmental cases and implement them for the sake of the educational process. Due to the interdisciplinary nature of my training and research, I am capable of teaching courses in environmental aspects in general and biogeochemistry in specific. My both governmental and individual experiences allow me to bring significant, real-world applications into the classroom while my strong background in biogeochemistry, chemistry and instrumental chemistry allows me to teach wid... courses	My research interests focus on studying the fate of terrestrial dissolved organic matter (tDOM) as it moves to the open ocean, and how major removal processes (photochemical, microbial oxidation and flocculation) are mineralizing and modifying the chemical structures of tDOM. I am also investigating how the microbial and aquatic species communities respond and tolerate environmental stresses by studying the changes in their metabolomics profiles (both targeted and untargeted metabolites).	✏ ⊗

▼ **Scheduled Teaching**

? Help

Banner student information system is the data source for courses with an enrollment of at least one student. This data is refreshed after census each term.

Definitions:

- Course - displays the course, schedule type, short term code, and section number. (Example: 'ENGL 3325 Lecture-09 W01' is English 3325 section W01 that was a lecture taught in Fall)
- Course Title - displays the name of the course
- Credit Hours - displays the number of units associated with the course component
- Enrollment - displays the student enrollment
- Additional Course Data - provides access to additional data fields related to a particular course. The classifications enabled are TAMU-CC Semester (the Banner Term Code) and TAMU-CC Workload (the basic workload credit value of the course).

Name	Description	Unit	View	Actions
Bibliography		TAMUCC	👁	
Curriculum Vita	The StandardCV is a default template that cannot be deleted. This version is intended to represent a 'standard' vita template version for the university. Additional templates can be created using this version as a starting point.	TAMUCC	👁	
Faculty Activity Report	The Faculty Activity Report vita is used to pull data from FAR into RPT cases.	TAMUCC	👁	
Vita sample - sections in listing format	This form includes all data entry sections from the profile and activities pages. Running this version is useful as a means of checking the data entered in your account. **Most sections display in listing format for ease of review.** • Publications display using the APA citation format. • Publications display in reverse chronological order. • By default, journal articles display under the sub-header_____." To assign individual articles to a different sub-header, open the record for a journal article and select a new value for the Article Type field.	TAMUCC	👁
